JEAN KADADIHI

Boston, MA | jkadadihimanzano@falcon.bentley.edu | +1 (786) 498-5645 | linkedin.com/in/jeankadadihi | jkadadihi.github.io/resume

EDUCATION

Bentley University — Waltham, MA
Bachelor of Science, Data Analytics and Finance — Expected Graduation: May 2027
General Finance Concentration and Minor in Business Management | Dean's List

PROFESSIONAL EXPERIENCE

Food & Beverage Importer (Confidential Client) — Miami, FL
AI & Automation Lead (Consultant), Part-Time — May 2026 – Present

- Built 10+ systems for two affiliated food and beverage importers on one shared stack (Next.js, FastAPI, Postgres), covering procurement BI, AP/AR, customs compliance, CRM, and executive reporting off the ERP.
- Engineered procurement BI that reconciles an eight-figure inventory book to the ERP's actual-cost report within $15, after tracing a 14x overcount to duplicate item-master records.
- Built an AP/AR portal from one codebase in 4 deployments (Supabase), routing ~190 emailed vendor invoices a week into one queue and saving 14 hours a week in AR.
- Automated US Customs ISF (10+2) filings, parsing vendor emails and staging filings every 15 minutes; dating sailings from ERP data cut false "missing ISF" alerts from 16 to 7.
- Built a duties control that checks every US Customs entry against ERP tariff codes and USITC Chapter 99 rates, rebuilding tariffs paid since 2018 to the dollar.
- Shipped a sales CRM with nightly ERP sync, consolidating 200+ accounts into one shared book and halving unowned accounts (80 to 40) across 8 reps with per-rep access.
- Run the shared infrastructure: one VM hosting 7 APIs behind ngrok tunnels, watchdogs, scheduled jobs, backups, and a kill switch that restores every app from a verified archive.

DHL Express — Plantation, FL
Finance Intern — June 2026 – August 2026

- Designed and built a new AR reporting capability from scratch, delivering aging, UAC, and country/customer reporting through Power Query, Office Scripts (TypeScript), Power Automate, and a custom interactive HTML dashboard.
- Engineered an automated Statement of Account (SOA) reporting workflow that generates and distributes customer-specific reports, saving 8 to 10 hours per week.
- Partnered with Finance, Collections, and CFSC stakeholders across the Americas to identify process inefficiencies and deliver automation that returned over 40 hours per week to the regional AR team.

Kumo Capital (Private Equity Real Estate) — Hybrid
AI Intern — February 2026 – April 2026

- Constructed and deployed a cloud-hosted automation and data pipeline (n8n + Azure) to source and ingest commercial real estate investment opportunities, improving deal flow coverage and reducing manual sourcing time.
- Designed a centralized PostgreSQL acquisitions database to structure and monitor property, ownership, and loan data, enabling scalable pipeline tracking.
- Built and trained a Claude-powered agent that engages brokers via SMS/email to source, qualify, and advance deals.

Mercantil Bank Panama — Panama City, Panama
Commercial Intelligence Analyst — June 2024 – August 2024

- Developed 10+ executive-level Power BI reports for risk management, compliance, and corporate finance departments.
- Engineered SQL databases for insurance and customer acquisition dashboards, processing international client data.

RELEVANT PROJECTS

VerifyPago: Payment Verification Automation — May 2025 – Present

- Built real-time payment verification SaaS for Zelle, Binance P2P, and PayPal, integrated with WhatsApp and Telegram.
- Built an end-to-end solution reducing manual verification time by 90% for cash-based businesses.

TECHNICAL SKILLS

Programming: Python, SQL, TypeScript, JavaScript, HTML
Frameworks & Data: FastAPI, Next.js, PostgreSQL, Supabase, SQL Server, Azure, Power BI (DAX, Power Query), Excel
Automation & AI: n8n, Power Automate, Microsoft Copilot, Office Scripts, APIs & Webhooks, LLM Agents (Claude), Prompt Engineering, Data Scraping
Deployment: Vercel, GitHub, ngrok, Windows VM Operations, Scheduled Jobs & Watchdogs
Languages: Spanish (Native), English (Fluent), Portuguese (Beginner)
Interests: BJJ, MMA, Football, Basketball, Golf, Fitness, Travel, Music, AI Coding, Volunteering
